

WTC, Precision Balance

DESCRIPTION

Fast and accurate mass determination both in the lab and in the factory. Energy-efficient electronics and display, combined with an internal rechargeable battery, are the perfect duo to allow you to work without access to mains power.

Additional accessories

Printer, computer, flash drive or additional display – you can easily connect them thanks to the fact that the balance is equipped with interfaces: 1 x RS232, USB type A and USB type B.

ALIBI Memory

The ALIBI memory used in the terminal allows for safe storage of weighing records without the possibility of unauthorized interference.
